Income-determined Abilities:

USA's abilities are restricted in the beginning of the game. All its Surface Ships begin in port. USA can neither research technology, send Lend-lease, move ships or Declare War, until it reaches certain income levels:

63 IPP	Declare War. Move ships through Panama Canal.

Peacetime Income Increases - Income while at Peace cannot exceed Full Production.

Strategic Objectives

Objective	Point(s)	Bonus
Big Blue Fleet. USA has Twice as many undamaged Capital Ships in the Pacific as Japan. Each Heavy Battleship and Heavy Carrier count as two. (Note: Ships in port count.)	1	Capital Ships can be built for -1 IPP per stage, per ship. Note this may stack with Improved Construction technology for a total of -2 IPP per stage, per ship.
Triumph of Capitalism. USA is at war with a Major Power and the combined incomes (including bonuses) of Great Britain and USA are more than twice the income of USSR (including bonuses).	1	USA can place one of its purchased units at an eligible factory in Great Britain's Home Country (each Player Turn). This does not affect the production capacity of the factory for the Great Britain player.
American Technological Supremacy. Have researched: • Heavy Strategic Bombers • Long-range Aircraft • Strategic Rockets • Jet Fighters	1	1 B-29, 1 Jet Fighter & 1 Strategic Rocket (once per game).
Sphere of Influence. Possess Wake, Midway, Attu & Kiska and Guam.	1	1 additional Strategic Naval Movement (each Player Turn).

Special Abilities

	Special Ability
I Want You!	The first time USA is at war with a Major Power, infantry-class units cost -1 IPP in the next USA Production Phase.
Monroe Doctrine 	The “Monroe Doctrine” allows USA to attack Comintern units that are bordering North or South American land zones regardless of its own income level without declaring war. USA is also allowed to attack Comintern-occupied land zones in North and South America. Comintern violations of the “Monroe Doctrine” do not trigger USA peacetime income increases. If an Axis Major Power attacks a land zone in North or South America, or has a Surface Ship ends its movement within 3 sea zones of USA Home Country, USA considers it a declaration of war. Sea zones affected by this are depicted by a small “Monroe” symbol on the map.
Operation Overlord	Once per game, in January, 1943 or later, USA units and British Commonwealth units may together amphibiously attack a German-possessed land zone bordering an Atlantic Ocean (A##) sea zone during the USA player’s turn. Aircraft and airborne assaulting units may participate in the attack. Eligible warships may provide shore bombardment. The participating British Commonwealth units may not have moved or been placed during the British Commonwealth player's turn. USA takes possession of the captured land zone.
Contain Communism	USA may, at any income level, send Lend-lease to KMT, if CCP has received Lend-lease from USSR during that Calendar Turn. (Exception: When USSR uses its “International Red Aid” special ability.) USA may use FEC-, French-, or Free French-possessed facilities to deliver this Lend-lease.
